It's a proud moment for Technopark as several companies with offices on our campus have been selected as some of the best workplaces in the world. We are indeed fortunate to have such esteemed players as part of our ecosystem. In the recent past, GenRobotics emerged as the winner of the Global IT Excellence Awards, cementing its position as a trailblazer in the technology sector.

As the festive fervour spills over, the IT sector is looking ahead at growth and a promising future. This festive season also saw a wonderful event conducted by the Govt Cyberpark in association with the Govt Cyberpark Cultural Committee, which was attended by many of the companies in the IT Parks. Suyati Technologies, a company based out of Infopark, was one of the venue partners for the Cyberpark Cultural Committee.

This festive season also saw the Techies take to celebrating it with pomp and grandeur as they showcased their skills in various fields, from sports to technology. It was a wonderful display of camaraderie and enthusiasm.

We are all set to meet and greet with great joy of being back at the offices and the message of hope. For any Malayali across the globe, Onam is not just a festival. It is a mélange of various traditional customs and activities, which bring people together and create a sense of warmth and togetherness. In the context of the current scenario, it is a ray of hope and a reminder of the importance of staying connected and keeping the spirit of Onam alive.

We are looking forward to a better tomorrow under the able leadership of our new CEO, Mr. Vishal Singh IAS. Singh has held various prominent positions and has the experience and expertise to oversee all IT Park operations in the state. A civil engineer by profession, he is known to be an efficient administrator and a strong leader.

Did you know? At our campus, there are 34 bodies of water, enough to fit into a mini lake. The campus also has a beautiful mangrove forest and a section of the University of Kerala botanical garden.

By the way, we recently launched Cyberpark Pro and the benefits of running the company in Government IT Parks knows no bounds. A recap of the event. Techies from the park actively presented an educational session on fire safety awareness and organized a road safety awareness session. We are glad that the techies are consistently playing an active role in promoting these important issues.

Onam celebrations - Aaravam 2.0. During the Onam celebrations, the Cyberpark Cultural Committee organized a week-long sports event with the Nightmare and Yellow teams. The final game was a nail-biting encounter between Red and Yellow teams on September 13th. Team Red and the Green team emerged victorious, making it a memorable Onam for all.

We are gearing up for GITE Global! This grand technology event will have an eye on safety, and we believe everyone can do their bit towards ensuring a safe and secure environment. We at Technopark take safety very seriously, and we encourage everyone to join hands in making GITE Global a safe and enjoyable event for all.
